☀️ “I Searched” Project 2027 ☀️

👋 For this year’s “I Searched” project, we will focus on the topic of Animal Nutrition.

👉 Make sure you look at the **sections of the skillathon manual that matches your age group**, so your project fits just right.

🔍 How to Do Your “I Searched” Project

For each search, you will write:

✨ “I searched (*resource*) for (*topic*), and this is what I found:”

Then explain what you learned *in your own words!*

🧠 Good Places to Search

You should use **reliable sources**, like:

- | | |
|---|--------------------------|
| ✓ Educational websites (not Google or Wikipedia) | ✓ Books or textbooks 📖 |
| ✓ University articles or publications | ✓ Your skillathon manual |
| ✓ Experts (people who know a lot about the topic) 👤 👩 | |

⚠️ **Important:** Your sources will be checked—so choose carefully!

📊 How Many Searches Do You Need?

- **Juniors:** 2 searches
- **Intermediates:** 3 searches
- **Seniors:** 4 searches

📝 Final Project

After finishing your searches:

- ✓ Put all your information together
- ✓ Write a summary of what you learned
- ✓ Use **correct spelling, grammar, and punctuation**
- ✓ Record it neatly in your record book

✏️ **Example (Junior Project)** - This is what your final project might look like:

I searched animatedknots.com for knots used with livestock, and this is what I found:

The website showed me how to tie the bowline knot, honda knot, square knot, quick-release, and half hitch. There were lots of other knots that are used for many different things, but I only looked at the ones that are part of our skillathon.

I searched the University of Florida Ask IFAS website for knots used with livestock, and this is what I found: A 4-H document on tips on halter breaking cattle by Dr. DeCubellis. The document gave lots of hints on how to halter break a calf and mentioned the important knots that you might want to know.

What I Learned:

After searching for knots used with livestock, I learned that the most important knot to know is the quick-release knot. It is also called the “manger knot”. I was able to see how to tie the knot and know when to use it. Anytime I am going to tie my animal, I will use the quick-release so if my animal gets upset and falls, I will be able to get them untied quickly so they don’t get hurt. I also learned that there are many useful knots, not just with livestock, but other areas too. I have decided that I will use the quick-release and half hitch the most while I am working with my animal, and when I have my animal at the fair.

⚠️ **Note:** This example is about **knots**, but your project should be about **Animal Nutrition** or a topic found in your skillathon manual.
